Care Coordination Team
Ophelia

Re: Patient Engagement Specialist

Hello Ophelia team,

I'm applying for the Patient Engagement Specialist role. I've spent more than 13 years helping people get into care and stay in care, and that's what this job is about.

For ten years I was a Care Navigator at Denver Health, working in colon cancer prevention. A lot of the people I worked with didn't want to come in. Some were worried about cost, some didn't understand the system, some didn't speak English, and some were just scared. My job was to listen first, figure out what was really in the way, and help them take the next step. I learned that people stay in care when they feel respected, not judged. I believe that matters even more for someone dealing with opioid use.

Since 2023 I've worked fully remotely. At Activate Care I supported patients by phone and online, and most recently at MedicaidSoft I was the first point of contact for nursing home staff, keeping track of every case in Zoho. I'm used to switching between phone, text, records, and chat, and I keep my notes clean and accurate.

I haven't worked in addiction treatment before, and I want to be honest about that. But being the first person a patient talks to, figuring out what's urgent, getting them scheduled, and helping them show up is work I know well. Ophelia's approach of treating people with dignity is the kind of care I want to be part of.

I'm a U.S. citizen, currently living in Brazil, and I'm available for either the Tuesday–Saturday or Sunday–Thursday schedule. I'd be glad to talk about how that works for your team.

Thank you for reading this.
